Quality Business Technology Solutions • [brandywinetech.com](http://brandywinetech.com) • 888-413-2131

# Thank you for your interest in Brandywine Technical Partners

## Our goal is to offer creative solutions and quality products for commercial business customers

By embracing commodity-based computing products, combined with open standards software systems, we provide our clients with quality solutions that encompass 90% of any businesses technology needs. Why should a business owner have to manage a team of 5 vendors when our in-house staff can streamline these efforts providing simple communication and lower costs with our “Single Source” solution.

Our expertise includes:

- Managed services for server and desktop based systems
- Voice over IP and legacy telephone systems
- IP based NVR security camera solutions
- Door entry and access control solutions
- Cat5/6 data cabling, fiber and wireless Infrastructure
- Video conference and conference room solutions

The “Cloud” as they call it, has become an ambiguous life force for any modern business, but the quality of that service is still very much tied to the overall health of the local network and its design. They say a chain is only as strong as the weakest link and our job is to be sure every link is healthy, and properly maintained so our business customers can focus on their bottom line.

Our mission is to work hard, be creative and become a cognitive resource for our clients. We want to support the immediate and long term goals for our clients as many of them have been with us for over 15 years. For that we will be forever grateful. I can only hope their loyalty and desire to retain our services for all these years is a testament to our commitment to quality and our overall business acumen.

Your success is the measuring stick by which we measure ourselves.

With warm regards,

**Yori Kasprzak**

*President, Brandywine Technical Partners, Inc.*
